

Mobili profilaktinė avių sveikatos priežiūros technologinė linija

1. Keywords: Sheep health, Sheep keeping, Sheep hoof care, Bonitization, Smart scales

2. Area: Livestock farming

3. Subarea: Sheep husbandry

4. Theme: A mobile technology line for preventive health care of sheep

5. Year: 2017

6. Summary: JSC „Šeduvos avininkystė“ specializes in keeping and selling of breeding sheep. In order to provide farmers with healthy breeding lambs and to reduce labor costs for maintaining breeding sheep, the company has purchased a modern technology line that meets animal welfare requirements and is used for preventive health care of sheep. The technological line includes: smart scales with computer data storage, a disinfection stall with a tub, an automatic sheep bonitization machine and a mobile reversible sheep hoof care tool. The purpose of this investment was to improve the sheep health and their hoof condition, as well as to assess the characteristics of a particular breed and the suitability of lambs for breeding (bonitization) more accurately. The implementation of this technology line did not cause any difficulties and the staff did not need any training.

7. More detailed version of the summary:

8. Effect: Economical, Animal welfare

9. Argumentation: Animal welfare and sheep health have improved (56% reduction in sheep morbidity over 3 years), the time spent on sheep hoof care, handling and shearing has been reduced twice, sheep bonitization is carried out with higher quality and 3 times faster, and the safety of the person performing the procedures (work safety) is ensured.
